
Phase 10: Demo Of Project

Use Case / Scenario

(What functionality is being tested — e.g., *When a Candidate record is created with Status = "Placed", an automatic Task should be created for HR.*)

Test Steps (with Input)

1. **Step 1:** Navigate to *Candidate* object → *New*.
 - Input: Name = *John Doe*, Status = *Placed*, Email = *john@example.com*.
 2. **Step 2:** Save the record.
 3. **Step 3:** Check related list "Open Activities" for automatically created task.
-

Expected Result

- Candidate record should be created successfully.
 - A new Task should be auto-generated with:
 - Subject = *Follow up with Candidate*
 - Due Date = Today + 2 days
 - Assigned To = HR Manager
-

Actual Result (with Screenshot)

- Candidate record created with Status = *Placed*.
- Task generated as per rule.
- **Screenshot 1:** Candidate record creation screen (input).
- **Screenshot 2:** Related Task record showing expected details (output).

Status

✓ Pass / ✗ Fail

Example for Different Features

1. Record Creation Test (Custom Object: Training__c)

- **Scenario:** Verify a Training record can be created with mandatory fields.
 - **Steps:**
 - Open *Training* → New → Enter *Training Name* = "Salesforce Basics", *Start Date* = Today, *End Date* = +5 Days.
 - **Expected:** Record saved without errors.
 - **Actual:** Screenshot of new Training record.
-

2. Validation Rule Test

- **Scenario:** Prevent saving a Candidate without Email.
 - **Steps:**
 - Try creating Candidate with Name = "Ravi Kumar", but leave Email blank.
 - **Expected:** Validation error message "Email is required".
 - **Actual:** Screenshot showing validation error.
-

3. Approval Process Test

- **Scenario:** Candidate Salary > 50,000 requires Manager Approval.
 - **Steps:**
 - Create Candidate with Salary = 60,000.
 - Submit for approval.
 - **Expected:** Approval request sent to Manager.
 - **Actual:** Screenshot of "Pending Approval" status.
-

4. Flow Test (Auto Field Update)

- **Scenario:** When Training Status = Completed, Flow updates Candidate Skill = "Certified".
 - **Steps:**
 - Update Training record to *Completed*.
 - **Expected:** Candidate Skill auto-updated.
 - **Actual:** Screenshot of updated Candidate record.
-

5. Trigger Test

- **Scenario:** After updating Training to Completed, Trigger assigns Skill to Candidate.
 - **Steps:**
 - Change Training status = Completed.
 - **Expected:** Candidate_Skill__c record created.
 - **Actual:** Screenshot of new Skill assignment.
-

6. Automatic Task Creation Test

- **Scenario:** When Candidate Placed = True, auto task assigned to HR.
- **Steps:**
- Update Candidate record → Status = Placed.
- **Expected:** New Task generated for HR.
- **Actual:** Screenshot of task.
